

PROJECT TITLE

Roadside Archaeological Site Inventory in Caltrans Right-of-Way, District 1

Insert Location Map Below:

Project Location: Various Counties

Co/Rte/KP/PM: Various Counties

PPNO: 4106

Project Description: Ongoing statewide process of completing the archaeological inventory and data gaps in the Caltrans right-of-way.

Project Scope: Contract to investigate District 1 right-of-way for archaeological resources.

Existing Funding: IIP: \$0
RIP: \$0
Other: \$0

Future Funding Need: \$0

Total Estimated Cost: \$1280

Project Schedule:

Start Environmental Studies	10/05
Start Service Contracting Request	12/05
Complete RFP Process	10/06
Begin Service Contract	12/06
Project Completion	06/09

PROJECT INFORMATION

Purpose & Need for the Project:

Caltrans proposes inventorying archaeological sites within the right of way of State rural conventional highways in District 1 by means of a records search of existing site information at the statewide archaeological information centers and an on-foot survey of an estimated 90% of the total rural conventional highway miles. The project also includes electronic entry of site data from the records search and survey into the Caltrans GIS database as the data are generated. This information could then be used in developing schedules and avoiding resources on new projects. These data will also be provided to the appropriate archaeological information centers and the State Office of Historic Preservation's California Historic Resources Information System (CHRIS).

The project scope includes approximately 950 miles of rural highway in District 1.

The proposed project in District 1 would be part of the ongoing process of completing the inventory and closing the data gaps in the Caltrans right of way statewide.
